Belém (PA), Brasil

SUMMARY

Full Stack Web Developer and 4th-semester Information Systems student at UFPA. Experienced in building modern interfaces and designing scalable APIs. Currently deepening my knowledge of AI integration (LLMs/SLMs) and data engineering in web applications. Focused on building efficient technology solutions to solve real business problems.

SKILLS

Languages & Front-end: JavaScript, TypeScript, React, Vite, HTML5, Modular CSS3, Responsive Design
Back-end & APIs: Python (FastAPI), Node.js (Express), RESTful API development
Data & Analytics: PostgreSQL, SQL, Power BI, Excel, Pandas e NumPy
Infrastructure, Tools & Practices: Vercel, Git, Integração de IA (LLMs/SLMs), Agile Methodologies (Scrum)

PROFESSIONAL EXPERIENCE

UNDERGRADUATE RESEARCH SCHOLAR (PIBIC)

Belém, PA
September 2026 - Present

FAMED - Faculty of Medicine, UFPA

- Developing a virtual secretary using RAG (Python, FastAPI) that answers students' academic questions based on institutional documents, covering 20+ documents and multiple question categories.
- Using local language models to keep institutional data private, without relying on external APIs.

BACKEND DEVELOPER

Belém, PA
April 2026 - July 2026

National Association of Graduate Students (ANPG)

- Developed user registration modules and message automation for the institutional system, building features focused on the organization's communication.
- Contributed to cloud deployment infrastructure planning, mapping hosting services and DNS configurations, with deliverables organized through Scrum.

DESENVOLVEDOR WEB FREELANCER

Belém, PA
July 2025 - October 2025

TCCINE - Audiovisual Services Platform

- Developed the platform's interface with React and Vite, using semantic HTML, modular CSS, and reusable components to ease maintenance.
- Implemented responsive design, Formspree integration, and continuous deployment on Vercel with a custom domain, taking the platform to production.

FORMAÇÃO

- Bachelor's Degree in Information Systems (In Progress) – Federal University of Pará | 2025 - 2028
- Backend Development with Python – Futuro Digital Scholarship | 2025
- Data Analysis – Alura | 2026
- Small Language Models (SLMs) – PNAAT | 2026
